

Off-line standard and on-line interventional treatment workflow using Elekta Synergy®

Off-line standard treatment workflow: geometric adjustment – update prescription with new table position

This protocol is used for all treatments of ten or more fractions where the day-to-day variation is much less important than the systematic error.

On-line interventional treatment workflow: geometric adjustment – adjust new isocenter

This protocol is used for all treatments of less than ten fractions where the day-to-day error is as important as the systematic error.
